The TriLux Bonus bet considers both the player's initial two cards and the dealer's up card. If they combine to make a Flush, Straight, Three of a Kind, or Straight Flush, the player will win. After the dealer has completed the initial deal and revealed their up card, they may resolve the TriLux Bonus bet immediately.

KING'S BOUNTY

King's Bounty is an optional side bet for blackjack. Players must make a standard blackjack bet in order to make a King's Bounty bet.

The Player is paid if their first two cards add up to 20 (using traditional blackjack rankings). Their payout will increase if their 20 is of a particular type as shown on the pay table below. If the Player has a Pair of Kings in Spades, the dealer's cards will be used as well. If the dealer has a blackjack in this case, the Player will win the top award.

After the dealer has completed the initial deal and revealed their up card, they may resolve the King's Bounty bet immediately.

Exception: If a player has two Kings of Spades and the dealer has a potential blackjack, the dealer will settle that bet at the end of the round.

Dealer Envy - This payout goes to the dealer token pool. When the player hits a corresponding hand, the dealer will get a payout as well.
